Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE ____ MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the “pulses” with the “same magnitude voltages with opposite polarities of claims 19 and 23 and the “pulses” of “same currents with opposite polarities” of claims 26 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

Claims 18-20 and 23-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 18, it is confusing to state that the method is “applying a prepulse” (as stated in claim 9) and “applying a plurality of prepulses” (claim 18). It is not understood whether the “plurality of prepulses” in claim 18 in any way relate to the “prepulse” of claim 9. Thus, this is seen to be an antecedent issue. Also, there is no support found in the specification for there being both a “prepulse” and a “plurality of prepulses” being applied “prior to applying said programming pulse”.

Claims 19 and 20 are rejected for the reasons discussed above with claim 18.

In claim 19, line 5, “a first magnitude” has already been recited in claim 9. Also, there is no support found in the specification for the language recited in lines 6-7.

Art Unit: 2816

In claim 23, there is no support found in the specification for the language therein for similar reasons as discussed with claim 19.

Claim 24 is rejected for similar reasons as claim 18.

In claim 23, there is no support found in the specification for the language therein for similar reasons as discussed with claim 19.

In claim 25, there is no support found in the specification for the language therein for similar reasons as discussed with claim 19.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. §102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless —

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 5-25 are rejected under 35 U.S.C. §102(b) as being anticipated by Chan (cited by Applicant). Chan discloses, in Figs 2-4, a method having the steps of “passing a current limited pulse (second pulse of Fig. 2)”; and “passing a second pulse (third pulse of Fig. 2)”, providing the operation as recited by Applicant.

Allowable Subject Matter

Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 19 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action, to include all of the limitations of the base claim and any intervening claims and to further state that the “third magnitude” is

different than the "first magnitude". This would read over the reference to Chan which shows that the "first magnitude" is the same as the "second magnitude".

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Terry Cunningham whose telephone number is 703-308-4872. The examiner can normally be reached on Monday-Thursday from 7:30 to 6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Timothy P. Callahan can be reached on 703-308-4876. The fax phone numbers for Technology Center 2800 are 703-872-9318 for Before Final communications and 703-872-9319 for After Final communications. Please note, any faxed paper clearly stating **DRAFT** or **PROPOSED AMENDMENT** at the top will be forwarded directly to the Examiner. All others will be treated as a formal response and acted upon accordingly.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is 703-308-0956.
